Bernardino Ramazzini lecture:
Rick Neitzel: Assessment of occupational noise exposure in epidemiological studies

Friday, February 21, 2014 10.15-11.30
**Palle Juul-Jensen Auditorium, build.10, Aarhus University Hospital,
 Nørrebrogade 44, 8000 Aarhus C**

Rick Neitzel is an occupational hygienist whose research focuses on the characterization of exposures to noise, ototoxins, and heavy metals, and assessment of the risk of various health effects related to these exposures. He also studies injury risks associated with occupational activities and active transportation, as well as psychosocial stressors in the workplace. He is particularly interested in incorporating new methodologies and technologies into exposure and risk assessment efforts.
